Welcome to Lau Board!

Click on the buttons to play Mr. Lau's famous quotes.

| ALLRIGHT | ANY QUESTIONS? | AYE | CAN DO BETTER | CUP OF JAVA | I'M MOSES | IT'S DOABLE |

| LUNCHTIME | OH NO! | OHH | OK | PUT AWAY CELL PHONE | SEE ME | VERY DOABLE |

What is Lau Board?

Originally, Lau Board is a tribute to Mr.Lau and his amazing quotes through a soundboard app running on iPhones, written by Ben Cullen. Unfortunately, the App Store review team decided to reject this app because it is not "useful" enough, i.e. only Mr. Lau's students will find this interesting. But we all know, these inspiring quotes are for everyone.

Oakton CS Club Jan. 17, 2018 Meeting

IntelliJ IDea is better than eclipse than jGRASP
By Jonathan Guo

You can now learn how to make a webpage and adding your own homepage to our website by creating a new issue, copy and pasting the following text, then fill in your name and email account:

```
==== web request ====
{
"name":"Your name goes here",
"email":"Your public email account",
"template":{"name":"retro","type":"html"}
}
```

```
==== end web request ====
```

We explained why jGRASP is bad and highly recommend you to use eclipse or IntelliJ IDEA (you can get the ultimate version for free by applying the student pack using "official document", aka your student ID).

Oakton CS Club Jan. 31, 2018 Meeting

We briefly introduced the Swift programming language, and how you can learn it. You should definitely try it out before Apple annouces this year's WWDC Scholarship (which give you a chance to talk to Apple CEO and etc.) We'll definitely be talking about machine learning and artificial intelligence in the next meeting. Also, sign up for HackTJ if you haven't done so.

A Brief Tour
